

Max Messick

Junior Web Developer

Columbus, Ohio · (614) 749-5434 · maxamus87@gmail.com

Creative and curious Junior Web Developer with a passion for building intuitive, visually compelling web experiences. With over a decade of experience in customer service and technical support, I bring strong communication skills, a natural instinct for problem-solving, and a deep appreciation for the human side of technology. A lifelong computer enthusiast – having built and maintained my own systems – I recently completed a web development bootcamp at Color Coded Labs and have been channeling my creativity and technical curiosity into projects that balance aesthetics with functionality. My background as a digital illustrator gives me a unique eye for design that I carry into everything I build. Based in Columbus, Ohio, I am eager to grow as a developer and contribute to a team that values both craft and collaboration.

EMPLOYMENT HISTORY

CALL CENTER SPECIALIST

Columbus Metropolitan Library

Nov 2021 – Mar 2026

Assisted customers via phone addressing reference and account inquiries. Utilized technical skills to troubleshoot issues and provide optimal resources. Engaged with patrons through website chat, offering information on events and classes. Leveraged Microsoft Office to track data for customers and staff.

- Responded to 100+ customer inquiries daily, ensuring accurate information delivery.
- Streamlined data tracking, improving response time by 20%.
- Enhanced customer engagement through proactive chat assistance.
- Collaborated with teams to update library event information regularly.

CUSTOMER SERVICES ASSOCIATE

Columbus Metropolitan Library

Jun 2017 – Nov 2021

Assisted customers with reference inquiries and efficiently located materials. Leveraged tech expertise to troubleshoot and support self-service technology. Maintained collection presentation for optimal customer access and remained approachable for customers and staff.

- Enhanced customer satisfaction through prompt responses to inquiries.
- Streamlined technology support processes, reducing wait times.
- Improved collection organization, increasing ease of access.
- Fostered a welcoming environment for all patrons.

PROJECTS

Where's My Coffee? – Full-Stack Coffee Shop Finder

React, Vite, Express, PostgreSQL (Prisma + Supabase), Google Maps API

Built a full-stack app for discovering and reviewing local coffee shops, with an interactive map, search and filtering, JWT-based authentication, and favoriting. First project built collaboratively with an AI coding assistant, sharpening my thinking around architecture, styling systems, and debugging.
